

PCV-RX462DS

SERVICE MANUAL

Ver 2-2004A

US Model
Canadian Model

Revision History

Differences Manual

PCV-RX462DS is almost same as PCV-RX470DS.
This manual contains only the points which differ from PCV-RX470DS.
Please refer to PCV-RX450/RX460/RX470DS/RX480DS/RX490TV service manual
(9-874-306-12) for the information not contained in this manual.

• Main differences

CPU (P4/1.3GHz), HDD (40GB)

	PCV-RX470DS	PCV-RX462DS
CPU	P4/1.5GHz	P4/1.3GHz
HDD	60GB ×1	40GB ×1
Accessories iLINK Cable	O	×

[CORRECTION] This manual contains the following correction.
See original service manual.

SECTION 4

PROGRAM FOR SERVICE

4-1. General

The Diagnostic Programs for Service are available with the following three kinds.

1. PC-Doctor

This can test the Mother Board, CPU, Memory, FDD, HDD, and CD/DVD-ROM.

It is used for the PCV-RX52/RX62K/RX72K (J models) and PCV-RX450/RX460/RX462DS/RX463DS/RX465DS/RX470DS/RX480DS/RX490TV (US models).

2. SiS730 Video Diag

This can test the VGA (SiS730 Chipset built in).

It is used for the PCV-RX52 (J model) and PCV-RX450/RX460 (US model).

3. nVIDIA Video Diag

There are two types of diagnostic programs, one for the 16M memory Geforce used in the PCV-RX62K (J model), and the other for the 32M memory Geforce used in PCV-RX72K (J model)/RX462DS/RX463DS/RX465DS/RX470DS/RX480DS/RX490TV (US model).

4-2. PC-Doctor Starting Method

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

1. PC-Doctor for PCV-RX52/RX62K/RX72K/RX450/RX460/RX462DS/RX463DS/RX465DS/RX470DS/RX480DS/RX490TV
After the system started, set a DOS formatted 1.44M floppy disk without the write protection in the FDD, and the CD-ROM Disc in the CD-RW drive, select the model to be tested following the menu. All tests are carried out automatically.

Do not remove the Diag. disc during the test.

4-2-1. Test Items

CPU/COPROCESSOR TEST

The CPU/Coprocessor are tested.

MEMORY TEST

The memory is tested.

The bus throughput of the extended memory cannot be tested, and therefore N/A is displayed as the test result, but this is not a fault.

SYSTEM BOARD TEST

The Mother Board is tested.

Also, the keyboard and mouse are tested, thus requiring the keyboard and mouse to be connected to the set in advance.

SERIAL PORT TEST

The COM port is tested.

PARALLEL PORT TEST

The printer port is tested.

VIDEO ADAPTER TEST

The video card is tested.

Only the DOS legacy mode is tested.

FIXED DISK TEST

HDD is tested.

DISKETTE TEST

FDD is tested.

As the read/write operation is performed to the floppy disk, set the DOS formatted 1.44M disk without the write protection before the PC-Doctor is started. Also, if the PC-Doctor is booted from the CD, the boot image of CD is treated as the floppy 0 (drive A), and accordingly the FDD is treated as the floppy 1 (drive B).

In this case, the floppy 0 cannot be tested and N/A is displayed as the test result, but this is not a fault.

MISCELLANEOUS TEST

Other devices are tested.

CD/DVD-ROM read check, CPU type check, and configuration check of PCI device, etc. are executed.

4-2-2. Test Result

After the test finished, "PASSED" or "FAILED" is displayed.

In case of "FAILED" display, press the F1 key to display the log and then, check the faulty item.

Certain items cannot be tested and N/A is displayed, but this is not a fault.

Example of log file

PC-DOCTOR 2.0 SYSTEM TEST LOG

```
=====
Inventory.....
CPU MHz is too low (700 vs 750)
Inventory          FAILED
```

4-3. SiS730 Video Diag Starting Method

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

2. SiS730 Video Diag for PCV-RX52/RX450/RX460

After the system started, the file is automatically expanded on the RAM disk and the test starts.

4-3-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.

The contents of RAM disk are cleared when the power is turned off.

4-4. nVIDIA Geforce Video Diag Starting Method (For PCV-RX462DS/RX463DS/RX465DS/ RX470DS)

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

3. nVIDIA Geforce 16M Diag for PCV-RX62K/RX470DS/RX462DS/RX463DS/RX465DS

After the system started, the file is automatically expanded on the RAM disk and the test starts.

Confidential

4-4-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.
The contents of RAM disk are cleared when the power is turned off.

4-5. nVIDIA Geforce Video Diag Starting Method (For PCV-RX480DS/RX490TV)

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

4. nVIDIA Geforce 32M Diag for PCV-RX72K/RX480DS/RX490TV

After the system started, the file is automatically expanded on the RAM disk and the test starts.

4-5-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.
The contents of RAM disk are cleared when the power is turned off.

SECTION 5 SERVICE INFORMATION

5-1. JUMPER SETTING ON HARD DISK DRIVE

The hard disk drive of service parts can be used without changing factory jumper setting, when it was replaced for service.

Model	Part No.	Maker	Code	Capacity (formatted)
PCV-RX462DS	A-8048-262-A	Seagate	ST340823A	40 GB

SECTION 7 REPAIR PARTS LIST

NOTE:

- The parts listed here are for service, and therefore they may be different from the parts shown in circuit diagrams or used in the set.
- The category "C" in S/P column denotes that the parts are not always stocked.
- The parts with ♦ marking are stocked at the Division.

7-1. EXPLODED VIEWS AND PARTS LIST

The components identified by mark Δ, or dotted line with mark Δ, are critical for safety.
Replica only with part number specified.

Les composants identifiés par une marque Δ, sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

Specifications

PERSONAL COMPUTER VAIO

SONY®

Information in this document is subject to change without notice.

Sony and VAIO are trademarks of Sony. Intel logo and Intel Inside logo are registered trademarks of Intel Corporation. Pentium MMX is a trademarks of Intel Corporation. Microsoft, MS-DOS, Windows, the Windows 95, Windows 98, Windows 2000 and Windows ME logo are trademarks of Microsoft Corporation.

All other trademarks are trademarks or registered trademarks of their respective owners. Other trademarks and trade names may be used in this document to refer to the entities claiming the marks and names or their produces. Sony Corporation disclaims any proprietary interest in trademarks and trade names other than its own.

CAUTION

Danger of explosion if battery is incorrectly replaced.

Replace only with the same or equivalent type recommended by the manufacturer.
Dispose of used batteries according to the manufacturer's instructions.

Service and Inspection Precautions

1. Obey precautionary markings and instructions

Labels and stamps on the cabinet, chassis, and components identify areas requiring special precautions. Be sure to observe these precautions, as well as all precautions listed in the operating manual and other associated documents.

2. Use designated parts only

The set's components possess important safety characteristics, such as noncombustibility and the ability to tolerate large voltages. Be sure that replacement parts possess the same safety characteristics as the originals. Also remember that the (Δ) mark, which appears in circuit diagrams and parts lists, denotes components that have particularly important safety functions; be extra sure to use only the designated components.

3. Always follow the original design when mounting parts and routing wires

The original layout includes various safety features, such as inclusion of insulating materials (tubes and tape) and the mounting of parts above the printer board. In addition, internal wiring has been routed and clamped so as to keep it away from hot or high-voltage parts. When mounting parts or routing wires, therefore, be sure to duplicate the original layout.

4. Inspect after completing service

After servicing, inspect to make sure that all screws, components, and wiring have been returned to their original condition. Also check the area around the repair location to ensure that repair work has caused no damage, and confirm safety.

5. When replacing chip components...

Never reuse components. Also remember that the negative side of tantalum capacitors is easily damaged by heat.

6. When handling flexible print boards...

- The temperature of the soldering-iron tip should be about 270°C.
- Do not apply the tip more than three times to the same pattern.
- Handle patterns with care; never apply force.

Caution: Remember that hard disk drives are easily damaged by vibration. Always handle with care.

SECTION 3 MOTHER BOARD DESCRIPTION

3-1. MS-LE MOTHER BOARD (for PCV-RX450/RX460)

3-1-2 Hardware Description

Processor	AMD Athlon/Duron support, all speeds, voltages, 200MHz FSB
Chipset	SiS730
System RAM	64, 128, 256, 512 MB SDRAM x 2 Slots PC100/133 support, up to 1GB support
Super I/O	ITE IT8705F
System ROM	V29C51002T or equivalent
Audio	SiS730 Audio Controller + ADI AD1881A AC97 Codec
IEEE1394	Onboard TSB12LB26 + TSB41AB3 Three 1394 port (one for rear, two for internal)
LAN	Onboard Realtek 8100 10BaseT/100BaseTX support, Wake On LAN support
VGA	Onboard SiS730 Gfx
FDD	3.5 inch 720KB, 1.44MB, 2.88MB
IDE	Two IDE ports support PIO mode 0-4, Multiword DMA mode0-2, Ultra DMA mode 0-5, host side detection Bootable CD/DVD-ROM support
I/O	1 Serial ports 1 Parallel port (Bi-directional/EPP/ECP support) 6 USB ports (one for rear, two for front and three for internal) 1 PS/2 key, 1 PS/2 mouse port (mixed signal, notebook style)
AGP	1 AGP Slot AGP 2.0 compliance, AGP 2x/4x support DVI daughter card for SiS730 Gfx support
PCI	3 PCI Slot PCI 2.2 compliance, 3.3V AUX support Bus master support for all slots Combo card (serial IRQ) support for PCI slot 3

3-1-3 Form Factor

Meet Intel MicroATX version 1.0 specification

- Maximum 9.6 inches x 9.6 inches (244mmx244mm)
- Height restrictions of MicroATX version 1.0

3-1-1 Overview

- Intel MicroATX version 1.0 compatible
- Supports single socket A based AMD "Athlon/Duron" Processors
- SiS730 system controller with support up to 200MHz front side bus
- Two 168-pin DIMM sockets
- ITE IT8705F LPC I/F I/O controller
- Flash BIOS ROM support
- Onboard AC97 Ver2.1 Audio Codec
- Onboard iLink Controller
- Onboard 10BaseT/100BaseTX Controller
- Onboard SiS730 Internal Gfx and AGP 2.0 support (swappable use)
- Hardware monitoring support, FAN (CPU, SPS) control/monitor, Temp (CPU, Motherboard) sensor, Voltage (SPS, Vcore) monitor
- One AGP, Three PCI slots and NO ISA slot
- Suspend to RAM support (Wake up from Keyboard, Mouse, LAN, USB, Power button)
- Ultra DMA/100 support (host side detection)
- Keyboard/Mouse mixed signal (Notebook style)
- No Q-salt capacitors
- PC99 Compliant
- PCI 2.2 Compliant
- Windows Millennium Edition/Windows 2000/Whistler support

Confidential

- 3-1-4 Connectors and Headers**
- Single Socket A for Athlon/Duron processor connector. Heat sink grounding support
 - Two 168pin DIMM socket
 - ATX power supply power connector
 - One FDD / Two IDE Connectors
 - One AGP and Three PCI slots
 - 4-pin CD-ROM audio input (stereo) connector
 - 4-pin AUX audio input (stereo) connector
 - 4-pin Video audio input (stereo) connector
 - Two PS/2 connector (keyboard, mouse)
 - Six USB port connector, 1 for rear w/ LAN connector, 2 for front. 3 for internal
 - Ethernet Connector (w/ USB connector)
 - One VGA connector
 - Three IEEE1394 connector, 1 (6pin standard) for rear, 2 for headers
 - One Parallel (25pin) connector
 - One Serial (COM1, 9pin) connector
 - Line In/Mic In/Headphone Out mini-jack (w/ serial connector)
 - Front panel I/O header (Power/Sleep/HDD/LED2/Reset/Speaker)
 - Two Cooling fan connectors, 1 for CPU, 1 for SPS
 - Clear CMOS header (for BIOS)
 - Wake on LAN header (including 5VSB)
- 3-1-5 Graphics**
- SIS730 Gfx and AGP connector support (swappable use)
 - Primary VGA function by BIOS
 - SIS730 Gfx
 - SIS730 chipset integrated graphics
 - Soft DVD support
 - DVI support
 - AGP Graphics
 - AGP 2.0 compliance, AGP 2x/4x support
 - Support AGP connector with retention mechanism
 - DVI daughter card for SIS730 Gfx support
- 3-1-6 Audio**
- SIS730 Audio Controller + ADI AD'881A AC97 Codec
 - Circuit for utilizing soft audio required
 - External +12dB boost add for MIC IN input(Single Powered OP-amp required)
 - +6dB boost with power amplifier add for HEADPHONE OUT (LM4880 or equivalent)
 - Audio Quality meet PC99 specs
 - D to A SNR +85dB, THD +65dB FSA
 - A to D SNR +80dB, THD +60dB FSA
 - A to A SNR +85dB, THD +55dB FSA (LINE IN to LINE OUT, 1kHz sine wave, 0dB=1Vrms)
 - MIC SNR +75dB (-12kHz)
 - EMI filters (or equivalent consideration) on HEADPHONE OUT/LINE IN/Line Out for FCC/VCCI
 - Pop noise cancel function.
 - Audio enable/disable control circuit and controlled by the BIOS.

Line In	Specs	Notes
Headphone out (Line out)	1Vrms (typ) 2Vrms (max)	10k ohm impedance
	1.5 Vrms (max)	32 ohm load (drive headphone)
	2 Vrms (max)	10k ohm load
Mic In	0.1 Vrms (max)	Codec Boost Off

- 3-1-7 IEEE 1394 OHCI**
- Texas Instrument TSB41AB3 PHY
 - Texas Instrument TSB12LV26 LINK
 - Power provide +12V, 5W/port
 - EMI filters (TOKO 957CM-009) on the IEEE1394 Front access header / Rear access option header / Rear connector for FCC/VCCI
 - Selectable PHY power delivery for S3, S5 by mount option, and maximum current is 200mA
 - IEEE1394 enable/disable control circuit and controlled by the BIOS

- 3-1-8 LAN**
- Realtek RTL8100
 - 10BaseT/100BaseTX, Auto-negotiation
 - Wake-On-LAN function (S1, S3, S5)
 - Selectable power delivery for S3, S5 by mount option
 - LAN Connector mixed with USB style
 - LAN enable/disable control circuit and controlled by BIOS
- 3-1-9 Other Key Components**
- ITE IT8705F LPC Super I/O
 - V29C51002T (or equivalent) DIP type Flash ROM with socket
- 3-1-10 BIOS**
- Refer to Sony BIOS document released separately for further details.
- Award 6.0 or later based
 - Flash ROM, Upgradeable by user
 - Sony customization (i.e. Sony logo during boot up)

- 3-1-11 Power Management**
- APM 1.2
 - ACPI Rev 1.0b, S0, S1, S3, S4, S5 power state support
 - Resume event support by Keyboard, Mouse, USB, LAN and Power button (Refer to Sony BIOS document for the detail)
 - Power Delivery

	1394 PHY	USB	Key & Mouse	LAN
S0	Yes	Yes	Yes	Yes
S1	Yes	Yes	Yes	Yes
S3	Yes	Yes	Yes	Yes
S5	Selectable (Mount option)	No	No	Selectable (Mount option)

3-1-12 PS2 Keyboard / Mouse

- Keyboard/Mouse mixed signal (notebook style)

3-1-13 Floppy Drive Support

- 720K/1.44MB/2.88 MB diskette drive support

3-1-14 CD-ROM / DVD-ROM Drive Support

- Bootable CD support

3-1-15 IDE Drive Support

- 2 channel (4 devices) support
- PIO mode 0-4, Multword mode 0-2 support
- Ultra DMA mode 0-5 support, cable detect method (host method)

3-1-16 Main Memory

- 2 x 168pin DIMM sockets
- Support PC100/133 unbuffered 64-bit SDRAM 3.3V DIMMS

DIMM size	Configuration
32MB	4Mbit x 64
64MB	8Mbit x 64
128MB	16Mbit x 64
256MB	32Mbit x 64
512MB	64Mbit x 64

3-1-17 Battery Requirements

- Type 2032, 3V coin battery with socket on motherboard
- Battery life greater than 3 years on motherboard (without AC power supply)

3-1-18 Reliability

- MTBF over xxxx [TBD]

3-1-19 Mother Board Environment Specification

Parameter	Specification	Note
Temperature Non-operating	-40°C to +70°C	
Operating	0°C to +55°C	
Shock	[TBD]	
Vibration	[TBD]	

3-1-20 Power Supply / Consumption

The motherboard should meet the following power supply tolerance. -5V supply is not used in this motherboard (-5V connect only the voltage monitor circuit)

DC Voltage	Acceptable Tolerance
+3.3V	±5%
+5V	±5%
+5V STB	±5%
+12V	±5%
-12V	±10%

When installed in micro ATX chassis with SFX power supply, Athlon 1.2GHz, 128MB PC133 DIMM, 3.5-inch floppy drive, 60GB IDE hard drive, IDE DVD-ROM and CD-RW drive, and PCI MODEM card, the following table is provided as a guide for power consumption,

Mode	AC(watts) out of 120VAC Outlet
Windows ME desktop	[TBD]
Windows ME desktop, sleep mode (S1)	< 25W
Windows ME desktop, sleep mode (S3)	< 5W

3-1-21 WHQL

The motherboard must pass WHQL certifications when installed with appropriate peripherals, OS and driver.

3-1-22 Label Requirements

The motherboard should have a reserved area for the label or print.

- Product name
- Revision
- Sony parts number and serial number

3-1-23 Regulatory Compliance

The motherboard should be compliant with the following safety and EMI regulations when correctly installed in a micro ATX chassis.

3-1-23-1 Safety

Meet the following regulations.

3-1-23-1-1 UL

UL1950-CSA950-95

Reset table FUSE is requested for all I/O power lines

3-1-23-1-2 CSA

CSA C222 No.95-93

3-1-23-2 EMC

Meet the following regulations.

3-1-23-2-1 FCC Class B

3-1-23-2-2 VCCI Class B

3-2-1 Overview

This document describes the specification for the **WMT-LX** motherboard for PCV-RX470DS/RX480DS/RX490TV

- MicroATX version 1.0 compatible
- PG4423 socket, Pentium4 (Willamet) support.
- Intel 850 + ICH2 chipset
- AGP interface specification revision 2.0 compliance (support 2x/4x)
- AGP Card retention support
- Hardware monitoring FAN (CPU,PS) speed monitor/CPU Temp/sensor/Voltage monitor
- Four 184-pin RIMM sockets (RDRAM, maximum 1024Mbytes NonECC)
- PC800/PC600
- LPC I/F I/O Controller
- One AGP, Three PCI slots and NO ISA slot
- On board Ethernet
- Suspend to RAM support (Wake up from Keyboard, LAN, USB, Power button)
- Ultra DMA/100 enable (can support Host-side Detection)
- On board IEEE1394 OHCI
- Header for Front accessible IEEE1394 connector.
- Header for Front-accessible USB connector.
- Keyboard/Mouse mixed signal (Notebook style)
- On board AC97 2.0 Codec Audio
- Flash BIOS (Firmware Hub)
- No Q-salt capacitors
- PC99 Compliant
- PCI 2.2
- Heat sink grounding support for CPU

3-2-2 Form Factor

Meet Intel MicroATX version 1.0 specification

- maximum 9.5inches x 9.6 inches (244mmx244mm)
- height restrictions of MicroATX version 1.0

3-2-3 Connectors and Headers

- ATX power supply power connector with ATX12V, Power Supply Fan connector
- 1 FDD/2 IDE Connectors
- 4 184pin RIMM socket (gold plated)
- PG4423 socket
- 3 PCI slot and 1 AGP slot
- 4-pin CD-ROM audio input (stereo) connector
- 4-pin AUX audio input (stereo) connector
- 4-pin Video input: (stereo) connector
- One IEEE1394 (9pin) standard interface connector, two headers
- 4 USB port connector (2 for rear I/O, 2 with header for Front accessible area)
- Power/Sleep/HDD/LED2/Reset/Speaker header (Front Panel I/O header)
- 1 Parallel (25pin) connector
- 1 Serial (COM1, 9pin) connector in rear I/O
- 2 PS2 connector (Keyboard, Mouse)
- 1 MIDI/Game connector
- SOFA (Padlock) connector
- Line In/Mic In/Headphone Out mini-jack

- 1Cooling Fan connector (CPU)
- Clear CMOS header (for BIOS)
- CPU Clock select (optional)
- Thermal measurement header
- Ethernet Connector

3-2-4 Audio

- AC97 codec
- Circuit for utilizing soft audio required
- External +12dB boost add for MIC IN input (Single Powered OP-amp required)
- +6dB boost with power amplifier add for HEADPHONE OUT (LM4880 or equivalent)
- Audio Quality meet PC99 specs (TENTATIVE)
- D to A SNR +85dB, THD +85dB FSA
- A to D SNR +80dB, THD +80dB FSA
- A to A SNR +85dB, THD +35dB FSA (LINE IN to LINE OUT, 1kHz sine wave, 0dB=1 Vrms)
- MIC SNR +75dB (-12kHz)
- EMI filters (or equivalent consideration) on HEADPHONE OUT/LINE IN/GAME PORT for FCC/VCCI
- Pop noise cancel function.
- Audio enable/disable control circuit and controlled by the BIOS.

Line In	Specs (tentative)	Notes
Headphoneout (line out)	1Vrms (typ) 2Vrms (max)	10k ohm impedance
	1.5 Vrms (max)	32 ohm load (drive headphone)
	2 Vrms (max)	10k ohm load
Mic In	0.1 Vrms (max)	Codec Boost Off

3-2-5 AGP Graphics

- 2x/4x AGP interface
- use the universal connector
- Support the retention module
- AGP Interface Specification Rev 2.0 (From Intel)
- AGP Card Retention Specification rev 1.0 (From Intel)

3-2-6 IEEE 1394 OHCI

- Texas Instrument TSB41AB3 PHY (physical layer)
- Texas Instrument TSB12LV26 LINK (link layer)
- Power provide +12V, 5W/port
- EMI filters (TOKO 857CM-009) on the IEEE1394 Front access header/Rear access option header/Rear connector for FCC/VCCI
- IEEE1394 enable/disable control circuits and controlled by the BIOS.

- PHY power provided by the 3VSB_DUAL (S5) and maximum current is 200mA.

3-2-7 LAN

- Realtek RTL8139C
- Supports 10/100 Mb/s, Auto-negotiation
- Supports Wake-On-LAN function (S1, S3) ; selectable power delivery for S3, S5
- 10baseT Connector mixed with USB style

3-2-8 Other Key Components

- LPC SIO
- FWH (No Socket)

3-2-9 BIOS

Refer to Sony BIOS document released separately for further details.

- Award 6.0 or later based
- Flash ROM, Upgradable by user
- Sony customization (i.e Sony logo during boot up)

3-2-10 Power Management

- Suspend/Resume
 - Supports S0, S1, S3, S4, S5
 - Resume: Keyboard (programmable) , Mouse (programmable) , USB, LAN, and Power button (Refer to Sony BIOS document)
- Power Delivery

	1394 PHY	USB (ICH&HUB&Port)	Keyboard Mouse	LAN
S3	Yes	Yes	Yes	Yes
S5	Yes	No	No	Yes

3-2-11 PS2 Keyboard/Mouse

- Keyboard/Mouse mixed signal (notebook style)

3-2-12 Floppy Drive Support

- 720K/1.2/1.44/2.88 MB diskette drive support

3-2-13 CD-ROM/DVD-ROM Drive Support

- Bootable CD support

3-2-14 IDE Drive Support

- 2 channel (4 devices) support through ICH
- Ultra DMA /100 support, cable detetd method (host method)

3-2-15 Main Memory

- 4 x184pin RIMM sockets
- support PC800 unbuffered 64-bit SDRAM 3.3V DIMMS (single or double sided) below
- Maximum support 256MB (512MB support not validated)

RIMM size	Configuration
64MB	
128MB	
256MB	
512MB	

3-2-16 Battery Requirements

- Type 2032, 3V coin battery with socket on motherboard
- Battery life greater than 3 years on motherboard (without AC power supply)

3-2-17 Reliability

- MTBF over xxxx [TBD]

3-2-18 Mother Board Environment Specification

Parameter	Specification	Note
Temperature Non-operating	-40°C to +70°C	
Operating	0°C to +55°C	
Shock	[TBD]	
Vibration	[TBD]	

3-2-19 Power Supply/Consumption

The motherboard should meet the following power supply tolerance.
-5V supply is not used in this motherboard (-5V connect only the voltage monitor circuit)

DC Voltage	Acceptable Tolerance
+3.3V	±5%
+5V	±5%
+5V STB	±5%
+12V	±5%
-12V	±5%

When installed in micro ATX chassis with SFX power supply, Celeron466/65MHz, 64MB PC100 DIMM, 3.5-inch floppy drive, 10GB IDE hard drive, 4X IDE DVD-ROM drive, and PCI MODEM card, the following table is provided as a guide for power consumption,

Mode	AC (watts) out of 120V/AC Outlet
Windows ME desktop	[TBD]
Windows ME desktop, sleep mode (S1)	< 25W
Windows ME desktop, sleep mode (S3)	< 5W

3-2-20 WHQL

The motherboard must pass WHQL certifications when installed with appropriate peripherals , OS and driver.

3-2-21 Label Requirements

The motherboard should have a reserved area for the label or print.

- product name
- revision
- serial number

3-2-22 Regulatory Compliance

The motherboard should be compliant with the following safety and EMI regulations when correctly installed in a micro AT X chassis

3-2-22-1 Safety

Meet the following regulations.

3-2-22-1-1 UL

UL 1950-CSA950-95
Resettable FUSE is requested for all I/O power lines

3-2-22-1-2 CSA

CSA C222 No.95-93

3-2-22-2 EMC

Meet the following regulations.

3-2-22-2-1 FCC ClassB

3-2-22-2-2 VCCI ClassB

SECTION 4

PROGRAM FOR SERVICE

4-1. General

The Diagnostic Programs for Service are available with the following three kinds.

1. PC-Doctor

This can test the Mother Board, CPU, Memory, FDD, HDD, and CD/DVD-ROM.

It is used for the PCV-RX52/RX62K/RX72K (J models) and PCV-RX450/RX460/RX470DS/RX480DS/RX490TV (US models).

2. SiS730 Video Diag

This can test the VGA (SiS730 Chipset built in).

It is used for the PCV-RX52 (J model) and PCV-RX450/RX460 (US model).

3. nVIDIA Video Diag

There are two types of diagnostic programs, one for the 16M memory Geforce used in the PCV-RX62K (J model)/RX470DS (US model), and the other for the 32M memory Geforce used in PCV-RX72K (J model)/RX480DS/RX490TV (US model).

4-2. PC-Doctor Starting Method

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

1. PC-Doctor for PCV-RX52/RX62K/RX72K/RX450/RX460/RX470DS/RX480DS/RX490TV

After the system started, set a DOS formatted 1.44M floppy disk without the write protection in the FDD, and the CD-ROM Disc in the CD-RW drive, select the model to be tested following the menu. All tests are carried out automatically.

Do not remove the Diag. disc during the test.

4-2-1. Test Items

CPU/COPROCESSOR TEST

The CPU/Coprocessor are tested.

MEMORY TEST

The memory is tested.

The bus throughput of the extended memory cannot be tested, and therefore N/A is displayed as the test result, but this is not a fault.

SYSTEM BOARD TEST

The Mother Board is tested.

Also, the keyboard and mouse are tested, thus requiring the keyboard and mouse to be connected to the set in advance.

SERIAL PORT TEST

The COM port is tested.

PARALLEL PORT TEST

The printer port is tested.

VIDEO ADAPTER TEST

The video card is tested.

Only the DOS legacy mode is tested.

FIXED DISK TEST

HDD is tested.

DISKETTE TEST

FDD is tested.

As the read/write operation is performed to the floppy disk, set the DOS formatted 1.44M disk without the write protection before the PC-Doctor is started. Also, if the PC-Doctor is booted from the CD, the boot image of CD is treated as the floppy 0 (drive A), and accordingly the FDD is treated as the floppy 1 (drive B).

In this case, the floppy 0 cannot be tested and N/A is displayed as the test result, but this is not a fault.

MISCELLANEOUS TEST

Other devices are tested.

CD/DVD-ROM read check, CPU type check, and configuration check of PCI device, etc. are executed.

4-2-2. Test Result

After the test finished, "PASSED" or "FAILED" is displayed.

In case of "FAILED" display, press the F1 key to display the log and then, check the faulty item.

Certain items cannot be tested and N/A is displayed, but this is not a fault.

Example of log file

PC-DOCTOR 2.0 SYSTEM TEST LOG

=====

Inventory.....

CPU MHz is too low (700 vs 750)

Inventory FAILED

4-3. SiS730 Video Diag Starting Method

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

2. SiS730 Video Diag for PCV-RX52/RX450/RX460

After the system started, the file is automatically expanded on the RAM disk and the test starts.

4-3-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.

The contents of RAM disk are cleared when the power is turned off.

4-4. nVIDIA Geforce Video Diag Starting Method (For PCV-RX470DS)

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

3. nVIDIA Geforce 16M Diag for PCV-RX62K/RX470DS

After the system started, the file is automatically expanded on the RAM disk and the test starts.

4-4-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.

The contents of RAM disk are cleared when the power is turned off.

Confidential

4-5. nVIDIA Geforce Video Diag Starting Method (For PCV-RX480DS/RX490TV)

As the Diag. disc is a bootable CD, set the CD in the CD/DVD-ROM drive and turn the system power on.

The menu will be displayed, then select the following:

4. nVIDIA Geforce 32M Diag for PCV-RX72K/RX480DS/RX490TV

After the system started, the file is automatically expanded on the RAM disk and the test starts.

4-5-1. Test Result

After the test finished, "PASS" or "FAIL" is displayed.

The contents of RAM disk are cleared when the power is turned off.

SECTION 5 SERVICE INFORMATION

5-1. JUMPER SETTING ON HARD DISK DRIVE

The hard disk drive of service parts can be used without changing factory jumper setting, when it was replaced for service.

Model	Part No.	Maker	Code	Capacity (formatted)
PCV-RX480DS/RX490TV	A-8049-313-A	Maxtor	98196H8	80 GB

Configuration Jumper Settings

--

Model	Part No.	Maker	Code	Capacity (formatted)
PCV-RX450	A-8048-262-A	Seagate	ST340823A	40 GB

5-2. JUMPER SETTING OF MOTHER BOARD

The Mother board of service parts can be used without changing factory jumper setting, when it was replaced for service.

(for PCV-RX450/RX460)

CAUTION

Do not change the jumper with the power turned on.
Before changing the jumper, turn off the power and disconnect the power cord from the set.

Confidential

(for PCV-RX470DS/RX480DS/RX490TV)

Confidential

SECTION 6 FRAME HARNESS

6-1. CONNECTOR LIST

1. A7S-LE MOTHER BOARD (for PCV-RX450/RX460)

1-1 Internal connector

Power supply

20pin ATX type connector.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

PS FAN

Support FAN control of power supply.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Ground
2	FAN_CTRL (0V(S3), 2V(S1), 12 V(S0))
3	FAN_SEN

The FAN_CTRL line is controlled by the BIOS and this line is voltage control line

IDE Primary/Secondary

For 3.5" Hard Drive, 40 pin Header (2.54mm standard type)

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Host side detect Cable Type Using GPIOs

FDD

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

168pin DIMM socket x2

2 slot DIMM connector, 3.3V Unbuffered SDRAM

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

PGA423 socket

AMD Athlon/Duron supported

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

PCI Slot x3

Single Edge Contact PCI slot.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

PCI #3 slot has special connection at A11 pin.

The serial IRQ signal connects to the A11 pin on the PCI #3.

AGP Slot

Single Edge Contact AGP slot. Universal AGP connector

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

CPU FAN

Supports CPU cooling fan of 500mA or less. Voltage = 12V

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Ground
2	FAN_CTRL (+12 V)
3	FAN_SEN

Wake On LAN (not installed*: PCV-RX450/RX460)

Support Wake On LAN function

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	+5Vsb
2	Ground
3	WOL signal

CD Audio

4 pin standard 2mm single line header for CD Audio signal input

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Left Line In
2	Ground
3	Ground
4	Right Line In

AUX Audio

4 pin standard 2mm single line header for AUX Audio signal input

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Left Line In
2	Ground
3	Ground
4	Right Line In

IEEE1394 access header x2

8 pin standard 2.5 mm single line header for IEEE1394 Front connector.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Shell Ground
2	Ground
3	TPA
4	TPA*
5	TPB
6	TPB*
7	Ground
8	VP (Power)

VP line need over current protector. Raychem SMD150/33-2 or equivalent is used for that.

USB Front access header

12 pin standard 2.5mm Dual line Box header for Front USB connector.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	NC	2	NC
3	NC	4	NC (Key)
5	USB VCC1	6	USB VCC2
7	USBP2-	8	USBP3-
9	USBP2+	10	USBP3+
11	Ground	12	Ground

USBVCC2 and USBVCC3 line need the over current protector. Raychem miniSMD110-2 or equivalent is used for that.

I/O header

20 pin standard 2.5mm dual line header for LED/Switch unit

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	PWR_BTN	11	MSG_LED+
2	PWR_BTN_G	12	MSG_LED-
3	IDELED-	13	KEYLOCK
4	IDELED+	14	KEYLOCK_G
5	KEY	15	SMI
6	PWR_LED+	16	SMI_G
7	PWR_LED-	17	+5V
8	PWR_LEDB+	18	HD_LED2-

10	RESET G (GND)	20	SPKR

Battery Holder & Battery

Holder vender	LOTES B6615BP5L or equivalent
Holder location on MB	See the frame harness diagram
Battery vender	Sony CR2032 or equivalent

CPU thermal measurement header

This header is used for CPU thermal measurement.

This signal also routed to Super I/O for thermal monitoring.

2pin standard 2mm single line header for CPU thermal measurement

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	CPUTMPIN
2	GND

* Connectors mentioned (not installed) are not used even they are mounted on MB

Confidential

1-2 External connector Parallel

Connector location on MB	Rear side, see the frame harness diagram
--------------------------	--

IEEE1394 Rear connector

6 pin standard IEEE1394 Rear connector.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

P n	Signal Name
1	VP (Power)
2	Ground
3	TPB*
4	TPB
5	TPA*
6	TPA

VP line need over current protector.

Raychem SMD150/33-2 or equivalent is used for that.

PS2 Keyboard/Mouse

Connector location on MB	Rear side, see the frame harness diagram
--------------------------	--

PS2VCC line needs the over current protector. Raychem miniSMDC110-2 or equivalent is used for that.

USB/LAN

One USB connector for external USB devices (Support the stacked connector).

One 10/100Base-T connector

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	ACTLEDP	11	LANP8
2	ACTLEDN	12	LANP8
3	LILED	13	USBVCC1
4	LILEDN	14	USBP1-
5	TXPCON	15	UCBP+
6	TXNCON	16	GND
7	RXPON	17	NC
8	LANP5	18	NC
9	LANP5	19	NC
10	RXNCON	20	NC

USBVCC1 line need the over current protector.

Raychem miniSMDC110-2 or equivalent is used for that.

COM1 Port/Line Out/Line In/Microphone Jack

Connector location on MB	Rear side, see the frame harness diagram
--------------------------	--

1-3 Jumper Header

CMOS Clear

Clear the RTC data

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Jumper header

Combination of jumper caps:

	CMOSCLR	RBT_EN	SAFE_EN
1-2	Normal	Reboot Disabled	Safe Mode Enabled
2-3	Clear	Normal	Normal

* Connectors mentioned (not installed) are not used even they are mounted on MB

2. WMT-LE MOTHER BOARD (for PCV-RX470DS/RX480DS/RX490TV)

1-1 Internal connector

ATXPWR

20pin ATX type connector.

Connector location on MB See the frame harness diagram

Pin assignments:

Pin	Signal Name
1	+3.3 V
2	+3.3 V
3	Ground
4	+5 V
5	Ground
6	+5 V
7	Ground
8	PWRGD (Power Good)
9	+5 VSB
10	+12 V
11	+3.3 V
12	-12 V
13	Ground
14	PS-ON# (power supply remote on/off control)
15	Ground
16	Ground
17	Ground
18	No Connection
19	+5 V
20	+5 V

4pin ATX12V type connector.

Connector location on MB See the frame harness diagram

Pin assignments:

Pin	Signal Name
1	Ground
2	Ground
3	+12V
4	+12V

PS FAN

Support FAN control of power supply.

Connector location on MB See the frame harness diagram

Pin assignments:

Pin	Signal Name
1	Ground
2	FAN_CTRL (0V(S3) , 2V(S1), 12 V(S0))
3	FAN_SEN

The FAN_CTRL line is controlled by the BIOS and this line is voltage control line

IDE Primary / Secondary

For 3.5" Hard Drive, 40 pin Header (2.54mm standard type)

Connector location on MB See the frame harness diagram

Host side detect Cable Type Using GPIOs

FLOPPY

Connector location on MB See the frame harness diagram

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	Ground	2	HDsel
3	Ground	4	N.C.
5	Ground	6	DRIVE_SELECT_#3
7	Ground	8	INDEX
9	Ground	10	DRIVE_SELECT_#0
11	Ground	12	DRIVE_SELECT_#1
13	Ground	14	DRIVE_SELECT_#2
15	Ground	16	N.C.
17	Ground	18	DIRECTION#
19	Ground	20	STEP#
21	Ground	22	WRITE_DATA#
23	Ground	24	WRITE_GATE#
25	Ground	26	TRACK_00#
27	Ground	28	WRITE_PROTECT#
29	N.C.	30	READ_DATA#
31	Ground	32	SIDE_1_SELECT#
33	N.C.	34	DSKCHG#

--NOTE--

'HDsel' signal is sent from drive. It indicate 2HD(when High) or 2DD(when Low) media.

'MODE_SELECT#' is control signal of disk rotation speed. When this signal is High, Media rotates 300RPM (2MB). When Low, media rotates 360RPM(1.6MB).

184pin RIMM socket x4

4 slot RIMM connector, 2.5V Unbuffered RDRAMM

Connector location on MB See the frame harness diagram

PGA423 socket

Pentium4 supported

Connector location on MB See the frame harness diagram

PCI Slot x3

Single Edge Contact PCI slot.

Connector location on MB See the frame harness diagram

PCI #3 slot has special connection at A11 pin.

The serial IRQ signal connects to the A11 pin on the PCI #3.

Confidential

AGP Slot

Single Edge Contact AGP slot. Universal AGP connector

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

CPU FAN

Supports CPU cooling fan of 500mA or less. Voltage = 12V

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Ground
2	FAN_CTRL (+12 V)
3	FAN_SEN

CD IN

4 pin standard 2mm single line header for CD Audio signal input

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Left Line In
2	Ground
3	Ground
4	Right Line In

AUX IN (not installed*)

4 pin standard 2mm single line header for AUX Audio signal input

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Left Line In
2	Ground
3	Ground
4	Right Line In

Video (not installed*)

4 pin standard 2mm single line header for Video Audio signal input

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name
1	Video_L
2	Ground
3	Ground
4	Video_R

IEEE1394 header x2

8 pin standard 2.5 mm single line header for IEEE1394 Front connector.

IEEE1394 Front access header

Connector location on MB	Referred as 1394HEAD3 See the frame harness diagram
--------------------------	--

IEEE1394 Optional header (not installed*)

Connector location on MB	Referred as 1394HEAD2 See the frame harness diagram
--------------------------	--

Pin assignments:

Pin	Signal Name
1	Shell Ground
2	Ground
3	TPA
4	TPA*
5	TPB
6	TPB*
7	Ground
8	VP (Power)

VP line need over current protector. Raychem SMD150/33-2 or equivalent is used for that.

* Connectors mentioned (not installed) are not used even they are mounted on MB

Confidential

USB Front

12 pin standard 2.5mm Dual line Box header for Front USB connector.

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	+3V_Dual	2	NP1#
3	NP3#	4	NC (Key)
5	USB VCC1	6	USB VCC2
7	LP2+	8	LP3+
9	LP2-	10	LP3-
11	Ground	12	Ground

USBVCC2 line needs the over current protector.

Raychem miniSMDC110-2 or equivalent is used for that.

FRONT PANEL I/O

20 pin standard 2.5mm dual line header for LED/Switch unit

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Pin assignments:

Pin	Signal Name	Pin	Signal Name
1	PWR_BTN	11	MSG_LED+
2	PWR_BTN_G	12	MSG_LED-

Tip	Audio Left Out
Ring	Audio Right Out

Line In pin assignments:

Pin	Signal Name
Sleeve	Ground
Tip	Audio Left In
Ring	Audio Right In

Microphone In pin assignments:

Pin	Signal Name
Sleeve	Ground
Tip	Microphone mono In
Ring	Electret Bias Voltage

GAMEVCC line need the over current protector.

Raychem miniSMDC110-2 or equivalent is used for that.

1-3 Jumper Header

CMOS Clear

Clear the RTC data

Connector location on MB	See the frame harness diagram
--------------------------	-------------------------------

Jumper header

Combination of jumper caps:

	CMOSCLR
1-2	Clear
2-3	Normal

MEMO

SECTION 7 REPAIR PARTS LIST

NOTE:

- The parts listed here are for service, and therefore they may be different from the parts shown in circuit diagrams or used in the set.
- The category "O" in SIP column denotes that the parts are not always stocked.
- The parts with ♦ marking are stocked at the Division.

The components identified by mark Δ, or dotted line with mark Δ, are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ, sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.
